GS1 EPC/RFID Workshop

Delivering GS1 System of Standards the wireless way

This workshop is designed to help companies to improve business processes through the use of EPC/RFID technology.

You will learn the basic terminology of RFID technology as used in the industry and be able to gain knowledge of various hardware and software components and how they form a complete system and operate together.

> "We focused on usability with our business process analysis, and we built our system on foundational elements such as GS1 standards that will continue to function despite an evolving technology landscape."
>
> - Maryanne Flynn, Cisco

Key Learning Objectives

Overview of the end to end RFID system

RFID Applications and its benefits

A presentation of the hardware & software components

Basic framework for RFID deployment

Learn more about EPCglobal Network & RFID used in Supply Chain

Case study shared by RFID solution provider

Demonstrations and hands-on

Plus!
Learn more about government assistance schemes from the *SME Centre @ SMF!*
